## PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 6+ years building high-load web applications for 200K+ users. Expert in PHP/Laravel backend architecture combined with Vue.js/TypeScript frontend development. Skilled in MySQL/Redis optimization, Docker infrastructure, and CI/CD automation. Delivers complete product solutions — from RESTful API design to polished, responsive UIs. Experienced working with international clients remotely. Available immediately.

## EXPERIENCE

### Senior Full-Stack Developer · Skyweb24 · Jun 2024 – April 2026

- Designed and built a unified PHP core framework and a Vue.js component library shared across all company products, reducing new feature development time by 5×
- Architected Dockerized dev/production environments, standardizing deployments and eliminating environment-specific bugs
- Implemented CI/CD pipeline with automated testing (GitHub Actions), reducing production errors by 40%
- Optimized MySQL query performance and Redis caching strategy, achieving 3× throughput improvement under peak load
- Built observability stack with Grafana Alloy (metrics, logs, traces), reducing mean time to detect critical production errors from 45 min to 5 min (9× improvement)
- Developed TypeScript/Vue.js admin dashboards and user-facing interfaces, owning the full stack from DB schema to UI components
- Led code reviews and mentored 6 junior developers; established QA processes and unit/integration test coverage

Stack: PHP, Laravel, Vue.js, TypeScript, MySQL, Redis, Docker, Linux, Nginx, GitHub Actions

### Middle Full-Stack Developer · Skyweb24 · May 2023 – Jun 2024

- Contributed to high-load web applications processing 1M+ requests/day for a 200K+ user platform
- Built Vue.js frontend modules and REST API endpoints, collaborating across the full stack
- Introduced Redis caching layer, reducing database load by 60% during traffic spikes
- Optimized complex MySQL and PostgreSQL queries, improving response times across core API endpoints

Stack: PHP, Laravel, Vue.js, TypeScript, MySQL, PostgreSQL, Redis, Docker, Linux

### Full-Stack Developer · Freelance · Sep 2018 – Mar 2023

- Delivered 50+ backend projects for international clients across e-commerce, fintech, and SaaS verticals
- Built and integrated REST APIs, payment gateways, and third-party service connectors
- Developed responsive frontend UIs using JavaScript/Vue.js alongside PHP backends
- Built high-traffic e-commerce platform processing 5,000+ orders/day — product catalog, cart, checkout, order management, and payment integrations

Stack: PHP, Laravel, Vue.js, JavaScript, MySQL, MongoDB, Linux, Git

## TECHNICAL SKILLS

**Backend:** PHP, Laravel, Symfony, REST API

**Frontend:** Vue.js, TypeScript, JavaScript (ES2022+), responsive UI

**Databases:** MySQL, PostgreSQL, MongoDB, Redis

**Infrastructure:** Docker, Linux (Ubuntu/CentOS), Nginx, CI/CD, GitHub Actions

**Architecture:** High-load systems, Event-driven architecture, DDD, caching strategies

**Monitoring:** Grafana, logging and observability pipelines

## EDUCATION

**B.Sc. Software Engineering** · Siberian Federal University · 2018

## LANGUAGES

English — C1 (Advanced, comfortable in technical interviews) · Russian — Native
