Middle Full-Stack Developer

Profile

Middle Full-Stack Developer with 6+ years building high-load web applications for 200K+ users. Expert in PHP/Laravel and Vue.js/TypeScript; designed scalable backends, optimized MySQL/Redis, and standardized Docker-based environments and CI/CD pipelines to accelerate feature delivery 5× and reduce production errors by 40%. Implemented Prometheus/Grafana observability (cut mean time to detect issues from 45 to 5 minutes) and lead code reviews and mentoring to deliver end-to-end product solutions from RESTful APIs to responsive UIs.

Areas of Expertise

- PHP
- JavaScript (ES2022+) / TypeScript
- Docker
- Grafana
- Laravel
- MySQL
- CI/CD
- Unit & Integration testing
- RESTful API
- PostgreSQL
- Github Actions
- Vue.js
- Redis
- Prometheus

Professional Experience

Skyweb24

Jun 2024 to Apr 2026

Middle+ Full-Stack Developer

- Architected a unified PHP (Laravel-based) core framework and Vue.js component library used across company products, accelerating new feature delivery by 5×
- Standardized Docker-based development and production environments, eliminating environment-specific bugs and deployment drift
- Implemented CI/CD with GitHub Actions and automated testing, reducing production errors by 40%
- Designed Prometheus and Grafana observability for metrics, logs, and traces, cutting mean time to detect critical issues from 45 minutes to 5 minutes
- Established QA and unit/integration testing practices while leading code reviews and mentoring 6 junior developers
- Delivered TypeScript/Vue.js admin dashboards and customer-facing interfaces end-to-end, from database schema to UI components

Middle Full-Stack Developer

- Maintained stability and provided support for a high-load web applications serving 1M+ requests/day for a 200K+ user platform in total
- Expanded core product functionality by building Vue.js frontend modules and REST API endpoints across the full stack
- Introduced a Redis caching layer that reduced database load by 60% during traffic spikes
- Improved response times by optimizing MySQL and PostgreSQL queries across core API endpoints

Freelance

Sept 2018 to Mar 2023

Full-Stack Developer

- Delivered 50+ backend projects for international clients across e-commerce, fintech, and SaaS, consistently translating requirements into production-ready systems
- Built and integrated REST APIs, payment gateways, and third-party service connectors to support reliable business workflows
- Developed responsive frontend UIs using JavaScript/Vue.js alongside PHP backends to deliver cohesive full-stack solutions
- Built a high-traffic e-commerce platform processing 5,000+ orders/day, covering product catalog, cart, checkout, order management, and payment integrations

Education

B.Sc. Software Engineering
Siberian Federal University

Sept 2014 to Jun 2018
